

Information for Organizers/ ACM-Approved Conference Vendors

FOR THE ACM PUBLISHING SYSTEM (TAPS)

The ACM Publishing System (TAPS) is a production platform that provides management capability for the conference proceedings publishing workflow. Its multi-layered approach integrates administrator, management, and operation levels to provide a complete mechanism for end-to-end deliverables (PDF/XML/Responsive HTML5 directly from the authors' source files.) within a single platform

Within TAPS you can:

- Manage the conference proceedings
- Monitor various stages of the production process
- Produce multiple formats such as PDF, XML, and responsive HTML5 from the authors' source file
- Approve the PDF and HTML formats for delivery to ACM's Digital Library
- Request technical helpdesk services using integrated ticketing system

Options for Processing Conference Proceedings with TAPS:

The ACM Publishing System allows organizers and ACM-approved conference vendors to manage their conference proceedings-related work. There are two options for processing any conference proceedings-related production work with TAPS:

1. Managing and Processing Conference Proceedings

Conference organizers and vendors manage the process and perform the file-processing steps as follows:

- Upload author source files
- Troubleshoot errors reported by TAPS as needed in the source files and resubmit to TAPS
- For additional assistance with errors, utilize the integrated support ticketing system
- Review the proofs (PDF and HTML5) generated by TAPS from the source files
 - If corrections are needed, make corrections to the source files and resubmit them to TAPS
- Approve the PDF and HTML proofs for publishing

2. Management Only of the Conference Proceedings (authors process their own files in TAPS)

- Authors upload their source files, contact support via ticketing system and resubmit corrected files if needed, and approve the final output produced by TAPS from their files. The conference organizers and

vendors check the progress of the paper processing and time schedules. If an author does not respond in a timely manner to TAPS' email communications, it will be forwarded to the respective organizer/vendor for resolution. Lastly, the conference organizer/vendor must review the final outputs for publishing.

Process Points for Organizers and Vendors in TAPS

The conference organizers and vendors can access TAPS with their specific username and password and can perform the following operations in TAPS:

Check the Details of the Conference Proceedings

After successful login, the organizer/vendor can check the list of events assigned to them for processing. TAPS receives this information from ACM's eRights System and displays the information for the proceedings that the organizer or vendor is responsible for. The following screen shot shows the home screen for a vendor to login. The vendor can then check the events assigned to them. The event names will appear in BLUE hypertext when the article metadata from the ACM eRights System has been loaded into TAPS.

ACRONYM	ISBN	SUBMISSION SYSTEM	START DATE	END DATE	STATUS	CURRENT STAGE	DETAILS
WWW 2018	978-1-4503-5639-8	Sheridan	04/23/2018	04/27/2018	1.58 %	Work in Progress

Figure 1: Screen Shot of Proceedings List.

Selecting the magnifying glass icon displays the details of that proceedings. Click on the "Event Metadata" link to verify the conference details such as venue, start and end date, etc., as this information is published in the proceeding's papers. The following "Event Details" screen shot displays this option.

Downloading the information related to all current papers

If Organizers/Vendors want the complete information for a proceeding's papers, such as:

- the status of all the papers
- their ACM IDs
- all author links for TAPS dashboards, etc.

Use the “Download Metadata” option on the papers’ dashboard to download all these details as a CSV file.

How to Upload Papers to TAPS for Processing

The conference organizer/vendor has two options for uploading the author source files in TAPS for generating the PDF and HTML outputs. The following details the information for each option:

1. Drop Zone (option only for submitting the complete volume)

The conference organizer/vendor can provide the manuscript files for all individual papers in a single submission or in batches. **It is important to note that each paper/component must follow the required file naming and structure as detailed:**

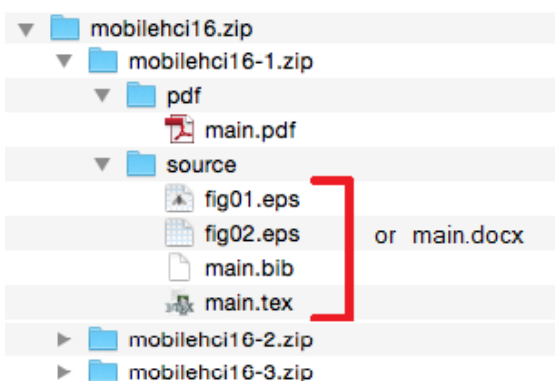

ZIP File Structure	Example
<pre><strip_acronym>.zip <strip_acronym>-<paperid>.zip source <filename>.tex <supporting_files> OR <filename>.docx pdf <filename>.pdf (Camera ready PDF) <strip_acronym>-<paperid>.zip <strip_acronym>-<paperid>.zip</pre>	

Figure 4: Example of the file naming and structure of the ZIP file for submission to the Drop Zone.

A ZIP file must be uploaded to the TAPS drop zone for processing: the FTP host and credentials to access the TAPS drop zone are:

Host: ec2-34-197-215-250.compute-1.amazonaws.com
User ID: paperbucket
Password: PAP@2017

2. Interface (option for submitting individual papers)

Use the TAPS interface to upload a single proceeding's paper. Click on the Paper Upload  icon. TAPS will then prompt for the respective file.

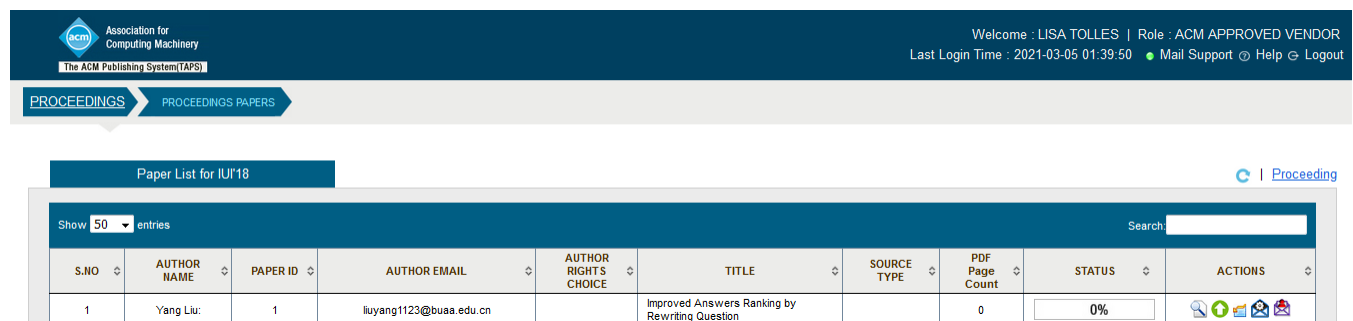

Figure 5: Screenshot of the proceeding's Paper List showing the Paper Upload icon.

It is important to note that each submission must follow the required file naming and structure as detailed:

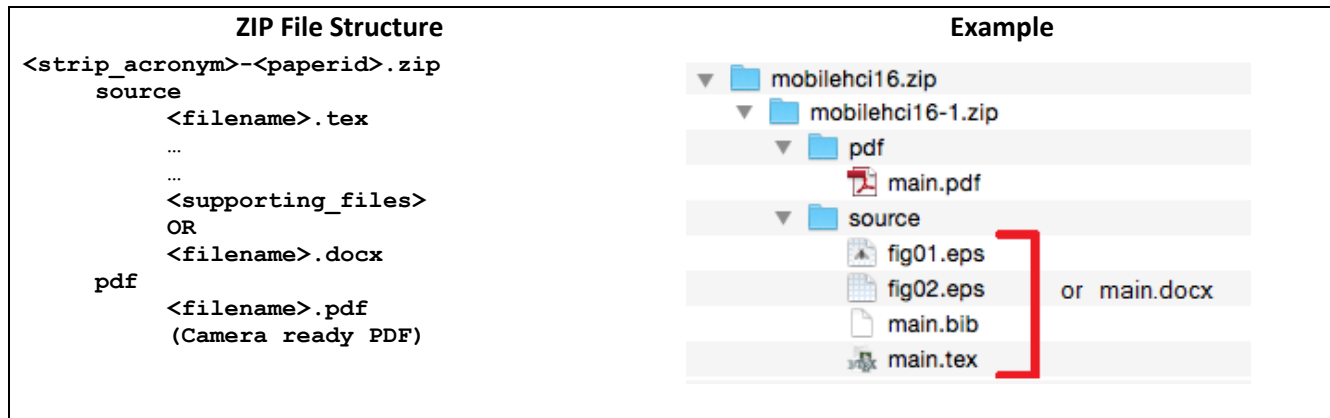

Figure 6: Example of the file naming and structure of the ZIP file for submitting a single proceeding's paper using TAPS' interface.

The ZIP file name should be <Proceeding Acronym>-<Paper ID>.zip. The ZIP file can contain 2 folders:

1. **pdf**: This folder contains the PDF output of your paper. (It is not mandatory to provide this folder.)
2. **source**: This folder contains the final source file (MS Word or LaTeX.) This folder must contain all necessary files/resources that are required to generate the final published formats. (It is mandatory to provide this folder.)

Supplements

If you have chosen ACM's site to collect supplements from the authors, then a link will be shared with the authors in the TAPS submission email that is sent out to them. You will also be sent a link where you can view and review the supplements that have been submitted by the authors of your proceedings.¹

Troubleshooting Errors

After receiving the manuscript ZIP files for the individual papers, TAPS will start processing them. If there are any errors while processing, TAPS will send an email and will generate the Errors/Warning  icon in the "ACTIONS" column of the interface. When this icon is displayed, that means TAPS encountered an error when processing the source file received for this paper. Click on this icon to get the log file for further information regarding the error. You can then correct the manuscript files and re-submit the updated ZIP submission file through the Submitting for Helpdesk Support  icon, or you can utilize the helpdesk services, via the integrated ticketing system, to assist in resolving the issue. Once the user clicks on this icon, these options become available, and you can choose the option you want to proceed with. If the user chooses the option to re-upload a corrected file, the upload icon will again become available for that specific paper.

¹ This feature is under development and will be available soon.

Figure 7: Example of the Upload icon becoming available again (in the second paper entry.)

For additional details regarding the “Support” option, please see the “Helpdesk Services in TAPS” section.

In addition, if there is a need to reprocess papers that were already approved, TAPS also provides an option to “reset” (using this  icon) any paper that has been approved by the author.

Transfer of the Proceedings Paper Metadata from ACM’s eRights System to TAPS

Whenever the rights form for a paper is completed and the required rights choice is selected, TAPS automatically receives the metadata information for that paper from the eRights System. The TAPS dashboard link is then sent to the corresponding author and TAPS is ready to accept the source file for that respective paper, in the specified format. Authors will also receive reminders from TAPS to upload their source files and hopefully not wait for the final date.

Please note that the data/information provided by the author for a paper in the rights form (i.e. the title, subtitle, author-affiliation, rights choice value, etc.) will replace the data provided in the author’s source file. The paper’s PDF XML, and /HTML will display the information from the author’s submitted rights form rather than source files, *so authors must provide the correct information in the rights form*. An author may request the rights form to be cleared, or reset and resent--there are a variety of reasons for this request, such as the correction of the author and/or title information, a change in third-party material declaration, etc. Authors must follow conference/journal requirements specified in their author or manuscript generation documentation.

Process for the Metadata Update in TAPS

Whenever any update is made in the rights management system's data, the updated data is sent to TAPS, but it is not received immediately--it is received by TAPS approximately every 2 hours.

- The metadata is only automatically updated in TAPS when either the source files for the paper are not uploaded yet, or when the paper is at the error stage in TAPS.
- If the paper is at the 75% or 100% processed stage in TAPS, then the metadata is not updated automatically because the paper has already been processed and is blocked for changes.
- For papers at the 75% or 100% processed stage, it is required to first reject the existing proof, then make the necessary updates to the data in the rights management system so that the new proof will receive the updated information. You may also contact TAPS support via the ticketing system to have this done.

Communicating with “Contact Author” via the TAPS Dashboard

TAPS provides the following options:

1. Send TAPS-generated PDF/HTML links to authors for their review using the HTML/PDF  icon, available for each paper on the Papers List Grid.
2. Organizers/Vendors can also send any specific instruction/information to the contact author by clicking on the Email  icon, also available for each paper on the Papers List Grid.

Indicator Icons Displayed on the Papers Dashboard and their Meanings

S. No	Icons	Meaning
1.		Details
2.		Upload/Reupload/Resubmit
3.		Work In Progress
4.		Invalid Input
5.		Errors/Warnings
6.		Final Layout Applied MS-Word DOCX File
7.		Final LaTeX source files

9.		PDF feedback
10.		PDF feedback disabled
11.		XML In Progress
12.		XML Completed
13.		HTML5 In progress
14.		View HTML5
15.		HTML5 Feedback
16.		HTML5 Feedback disabled
17.		Submitting for Helpdesk Support
18.		Success log
19.		Sending paper upload link mail to author
20.		Withdrawing paper processing from author's end
21.		Helpdesk query pending

22.		Resetting paper upload
23.		Send PDF/HTML links to contact author
24.		Send any instruction/information email to contact author

Checking the PDF and HTML Proofs Generated by TAPS

The successful processing of manuscript files in TAPS will generate the PDF, XML, and HTML5 output files. In addition, the final source files will also be available for download. The following screenshot shows that paper IDs 1, 12, and 13 are processed successfully, whereas helpdesk tickets have been raised for paper IDs 18 and 24. TAPS also shows Paper IDs 12, 13, and 24 have MS-Word source files.

Figure 8: Screenshot of the Paper List dashboard showing the various statuses for the papers.

In the case of MS-Word format source files, if the submitted files are in single-column format then TAPS automatically applies the two-column layout. TAPS receives the information from ACM's system regarding which composition layout needs to be followed for the papers in their respective proceedings (SIG-Conf or SIG-Plan) and applies the required style internally.

If a paper must be updated, you can download the formatted DOCX file by clicking on the MS Word  icon, or click on the LaTeX  icon and update it for the revisions needed. Once completed, please resubmit your article via the paper list dashboard for reprocessing, review, and approval.

TAPS will wait for a stipulated time for your review of the output generated (PDF as well as HTML5.) If the system does not receive a response within that time frame, it will consider both the outputs as approved and will proceed to the next stage.

Helpdesk Services in TAPS

A helpdesk service is available to assist you whenever assistance is needed.

The screenshot shows the TAPS portal interface. At the top, the header includes the ACM logo, the text 'Association for Computing Machinery' and 'The ACM Publishing System(TAPS)', and a user welcome message: 'Welcome : CRAIG RODKIN | Role : PORTAL ADMIN'. The last login time is '2021-03-05 18:20:04'. A red box highlights the 'Mail Support' link in the top navigation bar. Below the header, there is a breadcrumb trail: 'HOME > EVENT PROCEEDINGS LISTINGS > PROCEEDINGS > PROCEEDINGS PAPERS'. The main content area displays a 'Paper List for IUI'18'. A table lists papers with columns: S.NO, AUTHOR NAME, PAPER ID, AUTHOR EMAIL, AUTHOR RIGHTS CHOICE, TITLE, SOURCE TYPE, PDF Page Count, STATUS, and ACTIONS. A red box highlights the 'Support' icon in the ACTIONS column of the first row. The table shows one entry for paper ID 61 by Syed Masu. The status is 25%.

S.NO	AUTHOR NAME	PAPER ID	AUTHOR EMAIL	AUTHOR RIGHTS CHOICE	TITLE	SOURCE TYPE	PDF Page Count	STATUS	ACTIONS
61	Syed Masu	61	sbillah@cs.stonybrook.edu	acmlicensed	Write-it-Yourself with the Aid of Smartwatches: A Wizard-of-Oz Experiment with Blind People	doc	0	25%	[Support Icon]

Figure 9: Screenshot displaying where to contact support.

Two options for contacting the TAPS Helpdesk

(1) In the top panel of paper dashboard, there is a link to “Mail Support” (first RED arrow in Figure 9) which will direct you to a different dialog box where you can provide the details of your issue. We recommend that you provide the details of the conference proceedings along with the respective paper ID as well as a description of the problem you encountered. Our helpdesk will assist you accordingly.

(2) For any validation/compilation or any other paper processing-related issues, TAPS provides the error information in a LOG file (please see the information regarding this under the section entitled “Troubleshooting Errors.” The Submitting for Helpdesk Support icon (second RED arrow in Figure 9) provides the option for “Resubmit” and “Support.”

From these two options the below dialog box will be displayed where you can submit your query:

The screenshot shows a 'Helpdesk Support' pop-up window. The header includes the ACM logo and the text 'Association for Computing Machinery' and 'Publishing Management System'. The main content area contains a message: 'Thank you for contacting us. In order to serve you better please provide the following information:'. Below this, there are input fields for 'Name:', 'Email:', and 'Subject:'. A large text area labeled 'Queries:' is also present. At the bottom, there are two buttons: 'ADD REQUEST' and 'CLOSE'. A footer message states: '(We will get back to you within 24 HRS.)'.

Figure 10: Screenshot of Helpdesk Support pop-up window.

Check the Status of a Proceeding's Paper Processing

Organizers and vendors can check the status of a proceeding's paper processing under the column "STATUS" in the Papers List dashboard and can then manage the proceedings accordingly.

Finalize/Approve the Output

After reviewing and rectifying the issues for individual papers, users can approve the final outputs and TAPS will finalize the proceedings as per ACM DL requirements.

Uploading the Frontmatter/Backmatter for the Proceedings

The TAPS credentials email also contains the details of the drop zone where you can upload the FM/BM for your proceedings. *Please follow the correct nomenclature for the uploaded files as mentioned in the email.*
